Special Features

Special Features

Footer & Slide Numbers

To use the footer and page numbers, you'll need to go to the "Insert" tab and select "Header & Footer." Once selected, you'll be able to update the footer text as well as select slide numbers. Be sure to select "Apply to All" before exiting.

Curved Corner Photos

There is an option to use curved corner photos in the layouts, but it requires some special instructions on the following slide. When in doubt, the standard picture slide can be used without the curve.

Curved Corner Photos

Follow these instructions

- Duplicate this slide
- Right click the image and select “Change Picture”
- Choose “Picture from File” and navigate to the image you want to use and select “Insert”
- Once the image is placed, if you need to adjust it's cropping, you'll right click on the image again and select “Crop” which will open the ability to make adjustments

Featured Text

There are also options to feature a section of text on a 2-column or 1-column layout, as you see demonstrated here on the right side of this slide, as well as on the following slide.

It is important to pay attention to the amount of text in the box so you don't exceed the margins.

“Lorem ipsum dolor sit amet,
consectetur adipiscing elit,
sed do eiusmod tempor
incididunt ut labore.”

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
